Phnom Penh, Cambodia

PROFILE

Third-year Computer Science student from Paragon International University with experience leading enterprise-scale software projects from planning to production deployment. Skilled in microservice architecture, cloud infrastructure, backend engineering, and Agile project management. Passionate about building scalable systems, AI-powered applications, and modern distributed platforms.

SOFT SKILLS

- Leadership
- Project Management
- Systems Thinking
- Cross-functional Collaboration
- Technical Communication
- Problem Solving
- Adaptability
- Decision Making

HENGLONG LOEUNG

Junior Computer Science Student

EDUCATION

Bachelor of Computer Science

Paragon International University

2023 – Present (Year 3)

Current GPA 3.52

High School Diploma

Beltei International School

Graduated 2023 – BacII Grade B

ACADEMIC ACHIEVEMENTS

2025

2026

MyLMS - Paragon U. EPP Learning Management System

Project Manager

- Led a cross-functional team of 10 engineers across frontend, backend, API, UI/UX, and DevOps.
- Planned project scope, sprint milestones, risk management, and technical coordination using Agile Scrum.
- Oversaw deployment pipeline, cloud infrastructure, documentation, and stakeholder demonstrations.
- Technologies: Go, Next.js, Redis, RabbitMQ, PostgreSQL (cluster), Kong, FastAPI
- Key features:
 - Microservice with event-based driven architecture for scalability in mind
 - Equipped with integration API for third-party systems and services
 - Equipped with observability & configuration layer for easy log auditing and changing system configuration on the go
 - Integrated with Cloudflare R2, Google OAuth for easy Paragon email domain registration, Gmail SMTP.

2025

2026

STEM-ArKH+ - A Cambodian STEM Project Archive & Hub

Project Manager

- Managed a team of 13 developers building a national STEM archive platform for STEMEOC.
- Directed planning, sprint execution, stakeholder communication, and cross-team coordination.
- Oversaw integration of semantic search, AI-assisted question answering, document ingestion, and cloud infrastructure.
- Coordinated deployment of a production-ready platform supporting searchable STEM publications across Cambodia.
- Technologies: Go, Next.js, Redis, RabbitMQ, PostgreSQL (cluster), Kong, FastAPI, Melisearch Google Gemini
- Key features:
 - Microservice with event-based driven architecture for scalability in mind
 - Equipped with integration API for third-party systems and services
 - AI-ready document pipeline supporting thousands of publication ingestions with semantic search and vector embeddings
 - Equipped with observability & configuration layer for easy log auditing and changing system configuration on the go
 - Integrated with Cloudflare R2, Google OAuth, Gmail SMTP

TECH SKILLS

Programming:

- Go (Gin)
- TypeScript
- JavaScript
- Python
- PHP (Laravel)
- Java (Spring Boot)
- C/C++
- SQL

Frontend Development:

- Next.js
- Nuxt.js
- React
- Flutter
- Tailwind CSS, Bootstrap

Backend Development:

- REST APIs
- FastAPI
- gRPC
- JWT
- OAuth 2.0
- RBAC

AI & Search:

- Amazon Bedrock
- Google Gemini
- Multi-Agent AI
- RAG, Semantic Search
- Meilisearch

Databases & Messaging:

- PostgreSQL
- MySQL
- MongoDB
- Redis
- RabbitMQ

Cloud & DevOps:

- Docker
- Linux
- DigitalOcean
- AWS
- Google Cloud
- S3 Object Storage

Tools:

- Git/GitHub
- Postman
- Figma
- Agile Scrum

Project & Communication:

- ClickUp
- Slack

LANGUAGE

- Khmer (Native)
- English (Fluent)
- Chinese (Fluent)

2025
-
2026

Bedrock - AI Travel Concierge

Developed and deployed a multi-agentic AI chatbot for recommending and crafting travel plans.

- Technologies: Python, React, PostgreSQL, REST APIs, Google Gemini
- Key features:
 - Build modular AI agents for scalable architecture
 - Hierarchical LLMs orchestration for parallel computing
 - Integrated with third-party APIs for flight and hotel booking
 - Semantic and contextual for natural language travel planning
 - Personalized recommendations and AI-powered itinerary generation

2025
-
2026

Cloud Computing Experience

Deployed the projects that I have worked so far to a cloud server with reliability and speed.

Platform: DigitalOcean

- Provisioned and administered Linux cloud servers on DigitalOcean
- Configured PostgreSQL, Cloudflare DNS, Cloudflare R2 object storage, and CI/CD deployment pipeline

WORK EXPERIENCE

Leadership Experience

Project Manager - MyLMS (2025 - 2026)

- Led 10-member engineering team
- Sprint planning
- Stakeholder meetings
- Risk management
- Technical coordination

Project Manager - STEM-ArKH+

- Led 13-member engineering team
- Managed architecture planning
- Coordinated AI integration
- Managed project documentation
- Production deployment

INTEREST

- Badminton
- Guitar & music
- Hardware and software tinkering with Raspberry Pi & Arduino
