PROFILE

Third-year Computer Science student at Paragon International University with strong interest in full-stack web development, cloud computing, and IoT systems. Experienced in developing web applications using Laravel, building REST APIs, and deploying applications to cloud platforms such as DigitalOcean. Passionate about designing scalable systems and integrating hardware with modern web technologies.

SKILLS

- Programming
 - C/C++
 - JavaScript
 - PHP
 - Java
 - Python
 - Typescript
- Web Development
 - Laravel
 - REST API Development
 - HTML / CSS (Bootstrap & Tailwind)
 - Frontend-Backend Integration
- Tools & Platforms
 - Git / GitHub
 - DigitalOcean
 - Linux
 - MySQL / PostgreSQL

LANGUAGE

- Khmer (Native)
- English (Fluent)
- Chinese (Fluent)

HENGLONG LOEUNG

Junior Computer Science Student

EDUCATION

Bachelor of Computer Science

Paragon International University

2023 – Present (Year 3)

Current GPA 3.52

High School Diploma

Beltei International School

Graduated 2023 – BacII Grade B

ACADEMIC ACHIEVEMENTS

2025

-
2026

LogiFlow – Inventory Management System

Full-stack web application for CS262 course

- Technologies: Laravel, MySQL, REST API
- Key features:
 - Inventory tracking and management system
 - Backend API for inventory operations
 - Full-stack Laravel implementation
 - Designed for small e-commerce businesses

2025

-
2026

Scan2Attend – IoT Attendance System

Developed an IoT-based attendance system to modernize the Paragon International University attendance process.

- Technologies: ESP32, AS608 Fingerprint Sensor, IoT
- Key features:
 - Biometric fingerprint authentication
 - Attendance logging via ESP32 microcontroller
 - Real-time attendance recording system
 - Demonstrates integration between hardware and software systems

2025

-
2026

Cloud Computing Experience

Deployed a web application from CS 262 – Advanced Web Development to a cloud server.

Platform: DigitalOcean

- Configured Linux server
- Deployed Laravel application
- Managed database and server configuration
- Integrated Cloudflare R2, Brevo Mail Service and Cloudflare DNS

INTEREST

- Badminton
- Guitar & music
- Hardware and software tinkering with Raspberry Pi & Arduino
